

TALENT FLOW

Technical Assessment Candidate Report

Candidate & Assessment Details

Candidate Name: Alex Rivera	Assessment Title: LAB EXAM 2027
Email: alex@candidate.com	Duration: 60 Minutes
Education: B.S. Software Engineering, MIT	Date Completed: 28/9/2026
Skills: JavaScript, Python, React, Data Structures	Proctoring Score: 100%

OVERALL CANDIDATE SCORE: 84 / 100

Correctness: 85/100 | Code Quality: 80/100 | Efficiency: 85/100 | Problem Solving: 85/100

AI Performance Evaluation

Code executed cleanly with 0 exit code.

Automated Proctoring Audit Summary

Total Proctoring Flags Logged: 9 (Tab Switches: 1, Window Focus Loss: 8)

Submitted Code Solutions

Submission #1 - Valid Parentheses String (javascript)

```
// Write your solution for: Valid Parentheses String

function solution(s) {
  const stack = [];
  const pairs = {
    ')': '(',
    ']': '[',
    '}': '{'
  };
};

for (const char of s) {
  if (char === '(' || char === '[' || char === '{') {
```

Submission #2 - Reverse Linked List (javascript)

```
// Write your solution for: Reverse Linked List

function solution(head) {
  // If the platform provides the list as an array
  if (Array.isArray(head)) {
    return head.reverse();
  }

  // Standard linked-list reversal
  let prev = null;
  let current = head;

  while (current !== null) {
```

Submission #3 - Reverse Linked List (javascript)

```
// Write your solution for: Reverse Linked List

function solution(head) {
  // If the platform provides the list as an array
  if (Array.isArray(head)) {
    return head.reverse();
  }

  // Standard linked-list reversal
  let prev = null;
  let current = head;
```

Submission #4 - Valid Parentheses String (javascript)

```
// Write your solution for: Valid Parentheses String

function solution(s) {
  const stack = [];
  const pairs = {
    ')': '(',
    ']': '[',
    '}': '{'
  };
};

for (const char of s) {
  if (char === '(' || char === '[' || char === '{') {
```

Submission #5 - Validate Binary Search Tree (javascript)

```
// Write your solution for: Validate Binary Search Tree

function solution(root) {
  function isValid(node, min, max) {
    if (node === null) return true;

    if (node.val <= min || node.val >= max) {
      return false;
    }

    return (
      isValid(node.left, mi...
```
